FOCUS

More than Cosmetic Changes: Taking Stock of Personal Care Product Safety

Rebecca Kessler | A120

In recent years, under mounting pressure from advocacy groups, a number of major manufacturers and retailers have begun eliminating controversial ingredients from the personal care products they produce and sell. Companies are investing considerable resources to reformulate their products, even as they universally defend the questioned ingredients.

SPHERES OF INFLUENCE

Chemical Footprinting: Identifying Hidden Liabilities in Manufacturing Consumer Products

Lindsey Konkel | A130

Corporate chemicals management policies have traditionally revolved around making sure certain chemicals aren't found in products over a mandated threshold. Manufacturers are now going a step farther, using "chemical footprinting" to identify and manage hidden chemical liabilities in products and supply chains.
